2. (including special road maintenance service to trucking permittees on a reimbursable basis),

No specific authority

This provision was inserted into the appropriation language in the FY 1954 budget. It stemmed from an emergency need that developed during 1952 at Big Bend National Park, Texas. The road system at Big Bend became a transit for the heavy trucking of ore for defense purposes between Boquillas, Mexico, and the nearest railroad at Marathon, Texas. The weight, size, and capacity of the trucks being used were far beyond that for which the park road system was designed. As a result, the additional cost for maintenance and repair was far in excess of our available road maintenance funds. To meet this emergency, the Defense Materials Procurement Agency made available the sum of \$100,000 to rehabilitate and strengthen the road, with the understanding that the National Park Service would subsequently maintain all sections of it, such maintenance to be financed by reimbursement from the trucking permittees at a rate of 2 cents per mile.

16 U.S.C. 1701-1706 establishes the Youth Conservation Corps, defines how it shall be administered, and authorizes appropriations not to exceed a Governmentwide total of \$60,000,000 for each fiscal year. The appropriation language cites only section 1706, the section which provides specific authority for appropriations.
